

The International Symposium on Remote Sensing of Environment

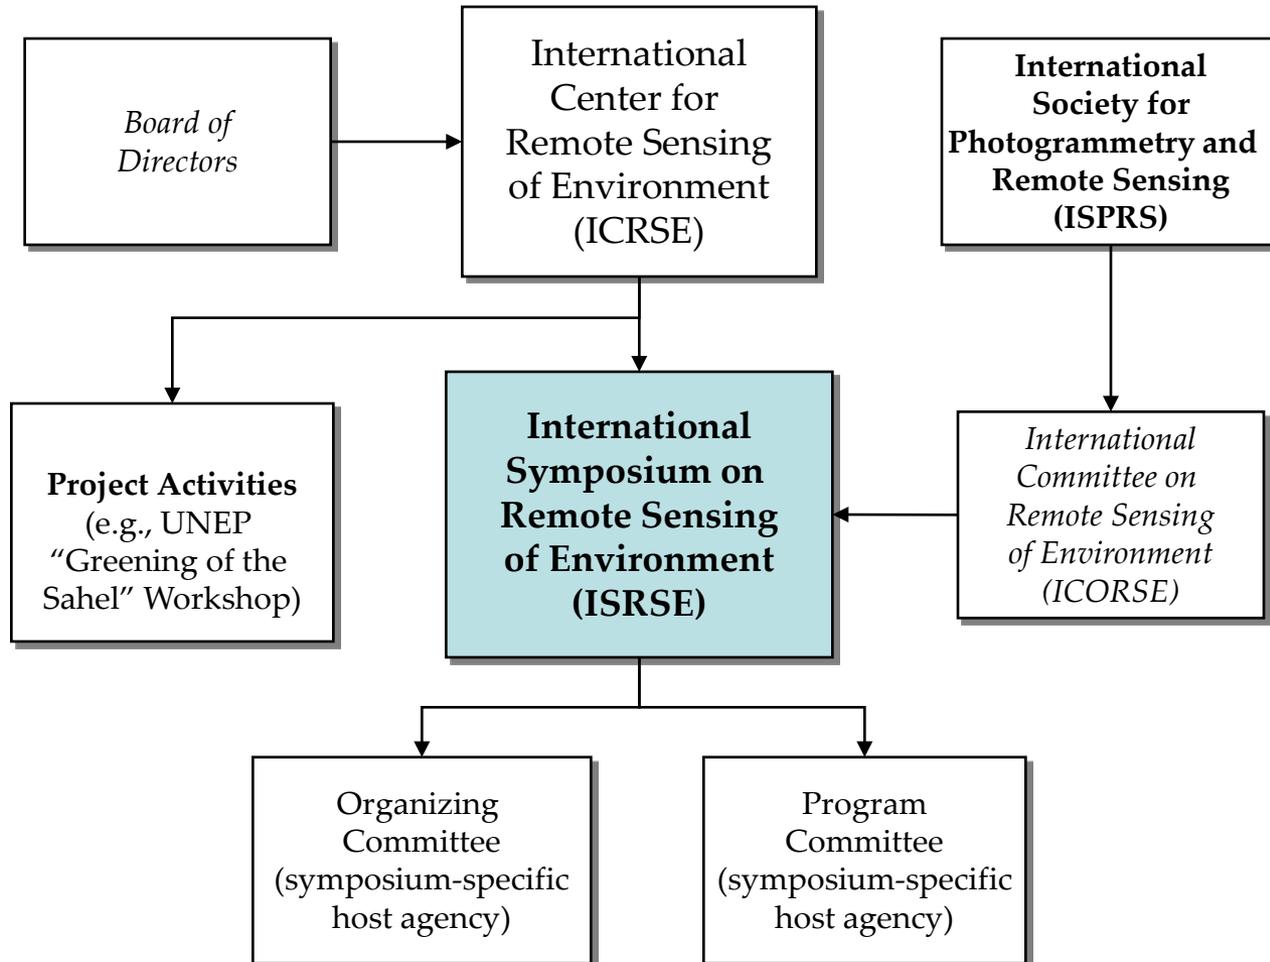

History

- First ISRSE was held in Ann Arbor, Michigan in 1962
 - Organized by the Willow Run Laboratories of the University of Michigan (later, the Environmental Research Institute of Michigan [ERIM])
- Thirty-two symposia have been held since
 - Oldest continuous remote sensing conference in the world

Organization

- In 1994, the International Center for Remote Sensing of Environment (a non-profit 501(c)(3) corporation) created to take responsibility for ISRSE
- Symposium oversight is provided by the International Committee on Remote Sensing of Environment (ICORSE)
 - In 2000, ICORSE became a standing committee of International Society for Photogrammetry and Remote Sensing (ISPRS)

INTERNATIONAL SYMPOSIUM ON REMOTE SENSING OF ENVIRONMENT

ICORSE members

Past Symposia

- 32nd Sustainable Development through Global Earth Observations
June 25-29, 2007
San Jose, Costa Rica
- 31st Global Monitoring for Sustainability and Security
June 20-24, 2005
St. Petersburg, Russia
- 30th Information for Risk Management and Sustainable Development
November 10-14, 2003
Honolulu, Hawai'i
- 29th Information for Sustainability and Development
April 8-12, 2002
Buenos Aires, Argentina
- 28th Information for Sustainable Development
March 27-31, 2000
Cape Town, South Africa

The Joint Research Centre of the European Commission

is pleased to propose hosting the

2009 edition of the

International Symposium for Remote Sensing of the Environment

(ISRSE 33)

in **Stresa, Lago Maggiore, Northern Italy.**

May 2009

NOVEMBER 2003
L. 6.20 Italy only

Condé Nast Traveller

THE WORLD'S MOST BEAUTIFUL PLACES

GREAT LAKES OF ITALY

LAKE MAGGIORE

Lake Mergozzo,
the hills and
valleys of the
Ossola district*

the location of ISRSE 33 in 2009: Stresa

Those who arrive in Stresa are offered a breathtaking view: Isole Borromee, flowers, historical villas...and more

Stresa

Stresa is a small town of about 5,000 inhabitants on the shores of the Lago (Lake) Maggiore located just in front of the Borromean Islands.

For centuries, Stresa has been a popular retreat for Europe's aristocrats, who have endowed the town with a number of beautiful villas.

Stresa is a renowned holiday resort as well as an important seat of cultural activities, meetings and international congresses.

Isole Borromee

Isola Madre

Isola dei Pescatori

Isola Bella

The **Borromean Islands** are a group of small islands in the Italian part of the Lago Maggiore. Their name derives from the Borromeo family, which acquired them in the 14th Century and still owns some of them today

ISRSE 33 in 2009

The JRC will provide support to the organization of the 2009 ISRSE-33 in close collaboration with:

- the European Space Agency (ESA)
- the European Organisation for the Exploitation of Meteorological Satellites (EUMETSAT)
- the GMES Bureau
- the GEO Secretariat
- the European Space Industry
- the Italian Authorities
- other Services of the European Commission
- other partners

The Joint Research Centre
invites you all to the
33rd ISRSE
May 2009 - Stresa, Italy
