

IWGADTS UPDATE TO ICCAGRA

Chris Webster

May 3rd, 2009

Highlights

- Three meetings (June, September, and March).
 - Presentations from OGC on SensorML
 - GPS discussions

Highlights

- General CSV packet for low bandwidth data exchange.
 - CVI,20081104T124347,23.342,7,78.34
 - Broadcast UDP

Highlights

- User Survey – platform commonality
 - Power and cabling hook ups
 - Instrumentation racks
 - Real-time data/nav feed
 - Data file formats
 - Instrument documentation requirements (certification)

Highlights

- Data file formats

- Leaning towards two: ASCII and binary (netCDF)
- ASCII, go with existing or create from scratch
- Worked with ICARTT to make more specific to ease translators
